

Dear FCC,

I support the petition to require VRS interoperability because I am frustrated with the different ways to call people on videophone. (explain why?)

I don't like that my VRS is blocked and sometimes I have to wait. (explain why?)

It is very important to make everyone equally accessible by setting up one system just like the telephone. (explain why?)

The different ways cause stress and can put us at risk. Please make whole video relay service (VRS) equal with same system. (explain why?)

Thank you for this opportunity to make my comment
